

# **CS7 SERIES AUTOMOTIVE SPEAKERS**

**Car Audio Loudspeakers** 

### Premium JBL sound at a portion of the price.

JBL CS7 Series speakers are the no-brainer upgrade for those who want a little more rock for their ride. They're easy to install, feature external crossover housing, fit practically any stock size, and can be driven by any factory head unit. And with Plus One™ woofer cones you'll get the power of a home audio system in the private listening confines of your car.

### Features

- ► Plus One<sup>™</sup> woofer cones
- ► External crossover housing
- ► Frequency response up to 21kHz
- ► Individually voiced
- Affordable pricing
- ► No-hassle installation
- ► OEM-level reliability testing

## **CS7 SERIES AUTOMOTIVE SPEAKERS**

Car Audio Loudspeakers

#### Plus One™ Woofer Cones

Harman's patented (US patent #7,548,631) Plus One™ polypropylene cones provide more overall speakercone area than other cones in its class — the result is higher sensitivity, increased low-frequency output and greater musical character.

#### External Crossover Housing (CS760C only)

The CS7 component systems feature external crossover housings, which provide extra space for true high pass and low pass sections - a step up from the coaxial models -smoothing out the critical midband response where most of the music occurs. There's also a tweeter level control, which allows fine adjustment to suit varying listening tastes and to accommodate different placement.

#### Frequency Response Up to 21kHz

Hear what you've been missing — the JBL CS7 Series offers a frequency response that delivers the fullrange response associated with exceptional sound.

#### Individually Voiced

For most brands, off-the-shelf speakers and a cursory approval of frequency response curves are good enough. That's not the case with JBL. We don't only listen to our speakers against the competition — we voice them against each other to ensure each line has the consistent JBL sound signature that's known and sought out by those who care about their audio. This is just part of an extensive development process undertaken by some of the best transducer engineers in the world to provide the finest listening experience at any price point.

### **Affordable Pricing**

The JBL CS7 Series are all designed to give audio enthusiasts more boom for the buck — while they maintain a conservative price point, there is never a compromise in sound.

#### **OEM-Level Reliability Testing**

JBL tests every speaker design to the same rigid specifications as the automakers, subjecting them to extreme conditions that would break lesser speakers. We freeze them, bake them, shake them, blast them with ultraviolet light and drive them at full power for days to make sure your audio investment lasts for years.

### What's in the box:

1 pair of speakers

Only for CS760C:

Pair of speakers

Pair of tweeters

Pair of crossovers

Tweeter surface mount

Tweeter angle mount

Tweeter mounting hardware

Owner's Manual

### **Product specifications:**

- Type: 4" coaxial car audio loudspeaker
  Peak power handling: 90W
  Power handling, continuous average: 30W
  Frequency response: 75Hz 20kHz
- Frequency response: 75Hz Nominal impedance: 4 ohms Sensitivity (2.83V/m): 90dB

- Type: 5-1/4" coaxial car audio loudspeaker Peak power handling: 105W
- Power handling, continuous average: 35W Frequency response: 70Hz 20kHz Nominal impedance: 4 ohms

- Type: 6-1/2" coaxial car audio loudspeaker
- Peak power handling: 135W Power handling, continuous average: 45W Frequency response: 55Hz 20kHz

- Nominal impedance: 4 ohms Sensitivity (2.83V/m): 93dB

- Type: 6" x 9" three-way car audio loudspeaker Peak power handling: 210W peak
- Power handling, continuous average: 70Wrms
   Frequency response: 40Hz − 21kHz
   Nominal impedance: 4 ohms
   Sensitivity (2.83V/m): 94dB

- Type: 6-1/2" component car audio loudspeaker system
- Peak power handling: 150W Power handling, continuous average: 50W Frequency response: 55Hz 20kHz
- Nominal impedance: 4 ohms Sensitivity (2.83V/m): 92dB
